### **Bogna's Page: Polish Wycinanki**

*Wycinanki* (vee-chee-NAN-ky), cut paper decorations, were originally created with sheep sheers, but you can use scissors to make your long cuts and snips.

This rooster design is from [www.dltk-kids.com](http://www.dltk-kids.com), a papercrafts Web site.

Use 8½" x 11" white paper for the design and colored art paper or construction paper for the background.

Fold the white paper lengthwise down the center. Lay the gray and white pattern over your paper, lining up the fold markings with your fold. Hold the pattern firmly in place while cutting away the gray. Use long scissor cuts to cut around the basic outline, then short snips to create leaves, feathers, and other jagged edges.

Unfold your design and paste it onto the background paper.

For your second *wycinanki* project, create a design of your own using animal and plant designs.
